

POWERING ENTERPRISE INNOVATION

One rail. Three live products.

Pravadh Labs is a product studio building AI-first software on a shared control plane — Salesforce DevOps, cross-platform data governance, and white-label delivery — without stitching Copado to Informatica to a spreadsheet.

3

Products live on the rail

15+

Data sources into Salesforce

1

Audit trail across deploy + migrate + govern

3

Pravadh Labs Private Limited
pravadhlabs.com
India Offices | global Salesforce GTM

Enterprise teams run change as three disconnected jobs.

Deployment, migration, and governance each get their own tool, owner, and blind spot. A deploy can succeed while the release still breaks downstream.

- **DevOps** — Copado, Gearset, AutoRABIT, Change Sets
- **Data** — Informatica, MuleSoft, Data Loader, one-off scripts
- **Governance** — spreadsheet audits, tribal knowledge, log digging
- **Delivery** — Jira chrome, feature-gated PM, no white-label or on-prem

Pain 01

No single source of truth

Who changed what, what moved, and who approved it lives in three systems — if it was recorded at all.

Pain 02

Migration knowledge walks out

Field mapping intelligence lives in people, not systems. Every new migration starts from zero.

Pain 03

Consultancies can't own the stack

Client-facing teams need Jira-grade delivery under their brand — or on their servers — without a source license.

Three large categories. One buyer persona.

We land where Salesforce architects, RevOps leaders, and implementation consultancies already spend — then expand across the rail.

Beachhead A

Salesforce DevOps + migration

Replace Copado-class deploy + Informatica-class ETL + manual audit stitching. Every mid-market and enterprise Salesforce org is a prospect.

~150K+ SALESFORCE CUSTOMERS GLOBALLY

Beachhead B

Cross-platform data governance

CRM + ERP + finance misalignment. GovernX targets orgs on Salesforce, Oracle, Zoho with reactive spreadsheet audits today.

MULTI-SYSTEM REVOPS & FINANCE OPS

Beachhead C

White-label delivery PM

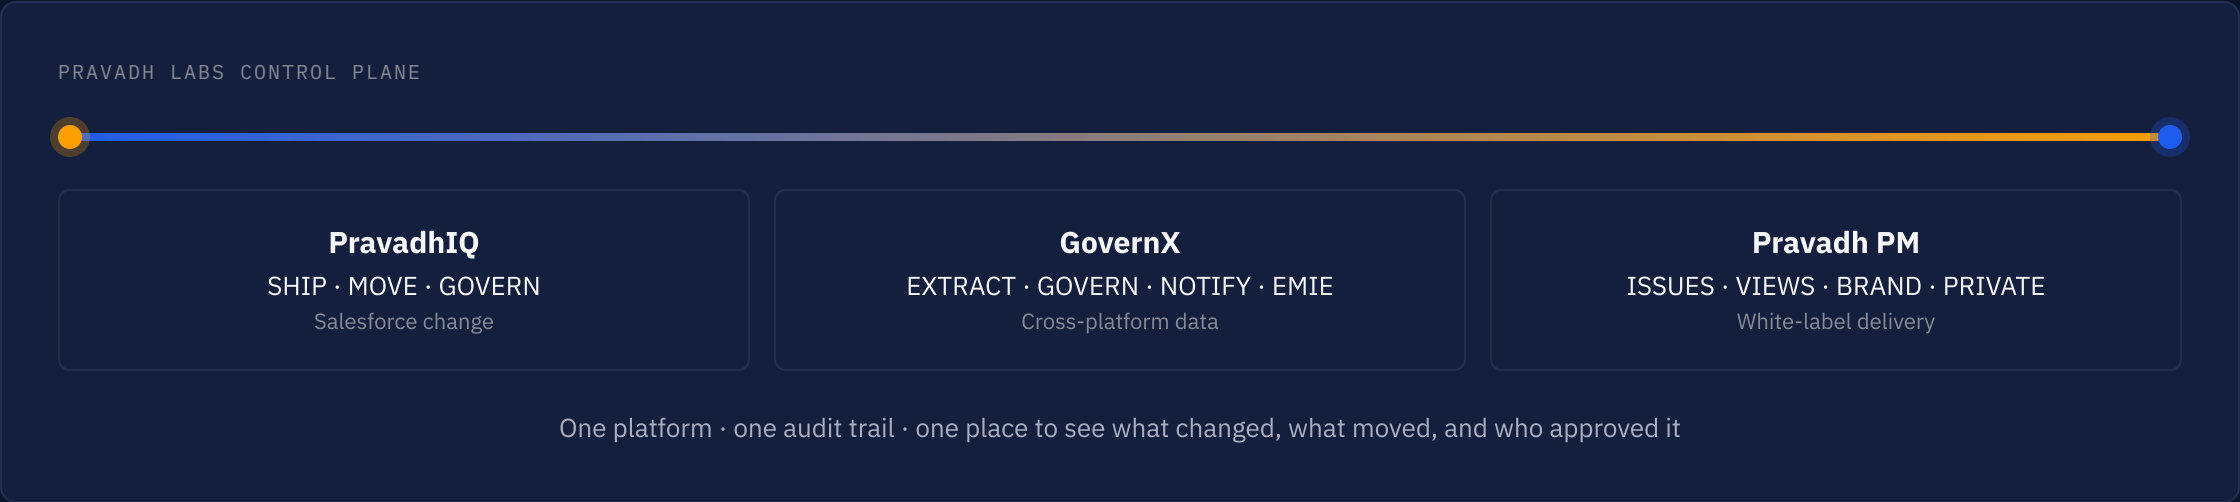

SIs and consultancies reselling delivery tooling. Jira-grade issues + ClickUp-grade views + private deploy without source transfer.

40+ PERSON DELIVERY TEAMS • VPC DEPLOY

The rail — one control plane, every product plugs in.

We build depth-first on a shared architecture. Each product solves one hard problem completely — then the next module lands on the same audit trail, approval model, and AI layer.

- AUDIT BY DEFAULT
- HUMAN-IN-THE-LOOP AI
- BUILT IN SALESFORCE ECOSYSTEM
- DEPTH OVER BREADTH

PravadhIQ — deployment, migration, governance for Salesforce.

[pravadhiq.pravadhlabs.com](#) · *Deployment success and release success aren't the same thing.*

SHIP

Env-to-env metadata promotion. Pre-deploy validation, dependency-aware packages, rollback on failure.

Replaces [Copado](#) · [Gearset](#) · [AutoRABIT](#) · [Change Sets](#)

MOVE

15+ sources — Zoho, HubSpot, Snowflake, Unleashed, files. Field mapping and transform before load.

Replaces [Informatica](#) · [MuleSoft](#) · [Data Loader](#)

GOVERN

Full audit trail, approval workflows, release + migration in one timeline. Data never leaves your org.

Replaces [spreadsheet audits](#) · [tribal knowledge](#)

60–70%

AI mapping accuracy (internal benchmarks)

70%+

Pravadh Labs
Investor Deck 2026

Time saved on field mapping vs manual

Pravadh GovernX — one governance layer across your ecosystem.

[pravadhgx.pravadhlabs.com](#) · CRM, ERP, and finance platforms that don't agree — governed on one canvas.

EXTRACT

Salesforce, Zoho, Oracle Fusion, NetSuite, EBS. Scheduled or on-demand. Visual pipeline nodes — inspect and replay.

GOVERN + NOTIFY

Field- and record-level policy. Real-time breach alerts linked to the exact pipeline step. AES-256 at rest.

EMIE Co-pilot

Plain-language queries on live canvas nodes. Suggests corrective action — human approves, audit entry logged. Not a chat silo.

ASK

"Why did NetSuite → SF skip 42 records?"

EMIE explains on the canvas, not in a separate bot.

EXPLAIN

Policy triggers & drift

Every breach tied to a pipeline step and timestamp.

Pravadh PM — the operating system for delivery.

pravadhpm.pravadhlabs.com · *Delivery tools are either someone else's brand, or someone else's cloud.*

ISSUES

WEB-4 style keys. Epic, story, task, bug. Comments, activity, command palette. Jira-grade workflow.

VIEWS

Board, list, timeline. Reports across spaces. Git and test-tool connections. Full product on every plan.

BRAND + PRIVATE

Your logo, domain, email. Hide Pravadh marks. Runnable package in your VPC — source stays with Labs.

14-day

Trial, then view-only until paid

40+

Person delivery team use case

Land with IQ. Expand to GovernX. Attach PM.

Same buyer — Salesforce architect, RevOps lead, SI partner — three expansion vectors on one contract relationship.

- **IQ** wins the Salesforce org — deploy, migrate, govern
- **GovernX** extends when CRM meets ERP/finance
- **PM** attaches when the consultancy needs client-facing delivery under their brand
- Partner portal + Dreamforce GTM multiply SI channel reach

Why one studio beats a portfolio

We ship one system deeply before the next. Shared audit model, approval workflows, and AI layer — not acquired point solutions glued together.

Software that disappears

Built where the work already happens. Reduces decisions instead of adding them. Practitioners demo on real scenarios — not slide decks.

We replace the stitched stack — not one vendor at a time.

INSTEAD OF...	PRAVADH LABS ON THE RAIL
Copado / Gearset / AutoRABIT / Flosum	SHIP Unified Salesforce deployment with rollback
Informatica / MuleSoft / Talend / Data Loader	MOVE Native migration with AI mapping
Spreadsheet audits + tribal knowledge	GOVERN One audit trail, every change
One-off extract scripts across CRM/ERP	EXTRACT Governed multi-platform pipeline
Log digging after breaches	EMIE Plain-language answers on the canvas
Jira / ClickUp you can't white-label	PM Your brand, your servers, no source

SaaS + partner-led. Expand on the rail.

PravadhIQ

Per-org / per-seat SaaS for Salesforce teams and SIs. Implementation services attach for complex migrations.

Land · expand seats · migration projects

GovernX

Platform fee + connected-system tiers. 7-day free trial. EMIE as premium governance copilot layer.

Trial → platform → EMIE upsell

Pravadh PM

Seat-based SaaS. White-label and private-deploy packages at premium. Full product on every plan — no feature-gating the board.

Cloud · white-label · private VPC

SI

Primary channel — resell IQ + PM under partner program

NDR

Cross-sell IQ → GovernX → PM on same account

Pravadh Labs

Investor Deck 2026

Salesforce ecosystem GTM + SI channel.

Events & community

Dreamforce 2026 (San Francisco), West Africa Dreamin 2026 sponsor. Live product walkthroughs — practitioner-led, not booth scripts. Calendly 30-min sessions.

Partner portal

SI-friendly deal tracking for PravadhIQ. Partnership conversations for white-label PM and GovernX pipeline attach.

Product-led trials

GovernX 7-day trial (no card). PM 14-day trial. IQ pilot on real migration projects — no cost, honest feedback.

India → global

Founder-led team across Ahmedabad, Bengaluru, Jaipur. Cost-efficient R&D with global Salesforce buyer access.

Three products live. One rail shipping.

- PravadhIQ, GovernX, and Pravadh PM in production
- 15+ data source integrations into Salesforce
- Partner portal operational for SI deal flow
- Dreamforce 2026 + West Africa Dreamin 2026 sponsor
- Built for 40-person delivery team deployments (PM)
- 60–70% AI mapping accuracy on internal benchmarks

Customer logos and revenue metrics available under NDA in data room.

Product studio proof

Depth-first execution

Three live products on one control plane — not a roadmap of half-finished modules. Each product complete before the next ships.

Community credibility

Salesforce-native team

Founder: 11+ years Salesforce architecture. Agentblazer Legend. Salesforce MVP nominee. Practitioner-built, practitioner-sold.

Security as default — honest about where we stand.

We'd rather tell you exactly where we are than round up.

PravadhIQ

TLS in transit. Environment isolation. Role-based approvals. Data never leaves Salesforce org. Rollback on failure.

GovernX

AES-256 at rest. TLS in transit. Cross-platform audit trail. Real-time policy violation alerts.

Pravadh PM

Workspace isolation. Private package in customer network. Source stays with Labs. Trial → view-only.

SOC 2 TYPE II — IN PROGRESS

ISO 27001 — IN PROGRESS

GDPR REVIEW — IN PROGRESS

INDIA DPDP ACT — IN PROGRESS

Founder-led product studio. Distributed across India.

Small team, depth-first. We'd rather ship one product that does one job completely than spread across a roadmap of half-finished ideas.

- **Founder** — 11+ years Salesforce solution & enterprise architecture. Former VP Salesforce Practice. Agentblazer Legend.
- **Offices** — Ahmedabad (HQ), Bengaluru, Jaipur
- **Build philosophy** — Inside ecosystems customers trust. AI that runs the rail, not around it.

Architecture & product

Salesforce-native builders shipping IQ, GovernX, and PM on the same control plane.

Partnerships & delivery

SI-friendly GTM. Live demos on real migration and governance scenarios.

Hiring with raise

Engineering, customer success, and partner sales to scale post-funding.

Raising to scale the rail.

Capital to accelerate GTM across all three products, complete enterprise certifications, and expand the SI partner network globally.

Use of funds

40% — Product & AI (EMIE, mapping intelligence, GovernX connectors)

30% — GTM (Dreamforce, SI partners, customer success)

20% — Security & compliance (SOC 2, ISO 27001, GDPR)

10% — Team (engineering, partnerships, delivery)
